

School Bus Avalanche Protocol

Hazard	Expected Avalanche Activity	Protocols
LOW	Avalanches are unlikely.	The school bus will follow the normal route, east on the highway and back to town on the loop road. No stops will be made in the high hazard area, between Johnson's and Cunningham's.
MODERATE	Avalanches are possible, but are expected to terminate above the highway.	The school bus will follow the normal route, east on the highway and back to town on the loop road. No stops will be made in the high hazard area, between Johnson's and Cunningham's.
CONSIDERABLE	Avalanches are probable and may affect the highway, but are expected to terminate above the highway.	The school bus will travel the loop road in both directions. No stops will be made in the high hazard area, between Johnson's and Cunningham's.
HIGH	Avalanches are expected to affect the highway. The highway will be closed though traffic may use the loop road.	The school bus will only go as far as the 5 mile firehouse.
EXTREME	Numerous and/or large avalanches are expected to affect the highway. The highway will be closed and the loop road may be subject to closures.	The school bus will only go as far as the 5 mile firehouse.
